SCALABLE Named Top Simulation & Training Company

– Recognized for the fifth time by Military Training Technology Magazine –

Culver City, CA (29 September 2014) -- SCALABLE Network Technologies, Inc. (SCALABLE), a leader in wireless network design and optimization tools, announced today that it has been recognized for the fifth time as one of Military Training Technology (MT2) Magazine's Top Simulation & Training Companies. MT2's editorial staff and a panel of industry experts evaluated companies worldwide who have made significant contributions to the military training community based on criteria such as innovation, military solutions provided, total military sales and overall program effectiveness.

"SCALABLE is proud to be recognized for our contributions to the training and simulation industry for the fifth time," said Rajive Bagrodia, SCALABLE founder and CTO. "We continuously strive to create unmatched network training and simulation tools to address real world problems and winning this award reinforces our goals are being met."

Since winning our first award in 2009, SCALABLE has continued to provide innovative, high-fidelity network simulation and emulation technology and cyber training systems to support military and commercial organizations around the world, including the recently released Network Defense Trainer, a live-virtual-constructive (LVC) system for integrating realistic cyber effects into physical/kinetic mission planning and mission rehearsal exercises.

About SCALABLE Network Technologies

Based in Culver City, California, SCALABLE provides network design and analysis tools and cyber training systems that enable customers to develop, test and deploy large, sophisticated enterprise and wireless networks and new communications equipment, and train personnel on cyber defense.

SCALABLE also provides specialized software solutions and engineering support services to major aerospace and defense contractors, the US Department of Defense, mobile network operators, research agencies and universities around the world.

More information on the company is available at scalable-networks.com.
